

The back of house, handled.

Count the walk-in, send vendor orders built from your pars, check deliveries in from the invoice, and find any bill in seconds. One phone app the whole kitchen uses.

Count in one walk

Items in the order they're stored. Count in the unit on the shelf, a photo on every item, works with no signal.

Orders from your pars

Weekday or weekend pars, + / - to adjust, one order per vendor, manager review. Emailed from your own address.

The invoice checks the delivery

Snap it at the back door. Matches? Checked in. Short or priced differently? Flagged, and a manager can email the vendor the same day.

Every bill, one ledger

Invoices and receipts, searchable by number, vendor, date, amount or item. Rent stays private. CSV for your accountant.

86 board, notes & tasks

86'd or low in two taps. Message one person or the whole crew with a note. Checklists and reminders.

Your whole crew

Seven roles set per location. English or Español per person. Printable how-to cards for every job.

iPhone & Android

No hardware

One address per location

Built in a busy, high-volume restaurant kitchen and used there every day - and just as handy for a small kitchen with a short order guide. Now opening to a small group of founding restaurants.
